A. Faculty Requirements

1. The faculty of the sleep program must include a minimum of three board certified sleep specialists.

List all faculty members board certified in sleep medicine

Name and Degree	Board Certification (ABSM or Sleep Medicine Examination of the ABIM, ABPN, ABP, ABOto or ABFP)	Date and Certificate Number

2. Faculty should include specialists in the areas of insomnia, central hypersomnias, sleep disordered breathing, parasomnias, movement disorders, circadian rhythm disorders and disorders of childhood. This requirement can be met by the faculty including one or more internists (including a pulmonologist), one or more neurologists and one or more psychiatrists, as well as one or more pediatricians (or pediatric neurologists) either as faculty members or associated with the program in a clearly defined manner.

FACULTY LIST

Name and Degree	Specialty (for internists, also include subspecialty)

List all faculty members of the academic sleep program.

2. (cont.) If there is no pediatrician or pediatric neurologist on the faculty of the program, list any pediatricians or pediatric neurologists associated with the program and describe the nature of the association in a brief narrative on a separate page *(APPENDIX 1)*

Specialty		

2. (cont.) In the absence of specialists from one or more of these disciplines, the requirement can be met by faculty members demonstrating special expertise in the area through the publishing of research papers, review articles or book chapters on the topic, or having been invited to present on the subject at national meetings.

If the lists above do not include at least one pulmonologist, neurologist, psychiatrist and pediatrician (or pediatric neurologist), then list below the faculty members whose special expertise meets this requirement. Explain on a separate page how the faculty members fulfill this requirement by listing publications or presentations *(APPENDIX 2)*.

The following list indicates which specialists are assumed to fulfill the requirements for each area of specialization:

Insomnia –psychiatrist Central hypersomnias – neurologist or psychiatrist Sleep disordered breathing – pulmonologist Parasomnias – neurologist or psychiatrist Movement disorders – neurologist Circadian rhythm disorders – neurologist, pediatrician (or pediatric neurologist) or psychiatrist

Specialty	Name and Degree of Faculty Member who Meets this Requirement	

2. Additionally, one or more otolaryngologists, dentists and psychologists should either be faculty members or be associated with the program in a clearly defined manner.

Complete the table below. If the specialists listed are not faculty members of the program, explain on a separate sheet the nature of their association with the program *(APPENDIX 3)*.

	Name(s) and Degree	Faculty member or associated staff
Otolaryngologists		
Dentists		
Psychologists		

B. Clinical Requirements

1. The sleep program must have a clinical component accredited as a sleep center by the AASM.

2. The sleep center must offer comprehensive diagnostic and therapeutic services for all categories of sleep disorders to patients of all ages, including ongoing care and chronic disease management.

Name of Accredited Sleep Center		
Date of Most Recent Accreditation		
Center Director		
Center Medical Director		
	Number of new adult patients seen in the center in last one year	
Center Patient Volume	Number of new pediatric patients (age ≤18 years) seen in the center in the last one year	
	Number of return adult patients seen in the center in last one year (excluding for PSG results)	
	Number of return pediatric patients seen in the center in last one year (excluding for PSG results)	
	Number of polysomnograms performed in last one year	
	Number of MSLTs/MWTs performed in last one year	
	Insomnia	
Breadth of Disorders	Central hypersomnias	
Seen Number of patients in	Sleep related breathing disorders	
each category seen in the center in last year (count	Parasomnias	
each patient only once):	Movement disorders	
	Circadian rhythm sleep disorders	

Explain on a separate page how the program fulfills the condition of providing ongoing care and chronic disease management *(APPENDIX 4).*

C. Educational Requirements

1. The sleep program must have an active ACGME accredited fellowship in sleep medicine.

Program Number and Date and Length of Accreditation	
Program Name	
Program Director	

2. The sleep program must participate in the education of medical students, residents and allied health professionals.

Explain on a separate page how the program fulfills this requirement *(APPENDIX 5).*

3. At least one of the sleep program faculty must either offer CME in the local region or regularly participate in national CME courses in sleep medicine.

List all sleep medicine CME events from the past one year by faculty members of the program.

Event	Name of Faculty Member
	1

D. Research Requirements

1. The sleep program must show evidence of an active interdisciplinary research program with multiple sleep program faculty participating and a proven record of research publication. The sleep program or a closely affiliated unit must have a history of extramural research funding (defined as other than funding for industry initiated protocols).

2. The sleep research program should ideally incorporate basic science or translational research as well as epidemiologic and clinical research. However, research in two of the following three areas will be acceptable: basic science or translational; epidemiologic; clinical (including diagnostic or therapeutic trials). (Industry initiated protocols will not qualify alone as evidence of clinical research). These programs must either fall directly under the sleep center or in a unit with a clearly defined close affiliation with the sleep center.

List all active or recent (last 3 years) research programs. Use one copy of Form D.1. below for each research program.

Title of Project		Name of Pri	ncipal Investigator
Co-Investigator	S	S	pecialty
Source of Funding	If industry	funding, indicate	Dates of Funding
Source of Funding	-	industry D or	Dutes of Funding
		or D initiated	
Indicate whether rese	_	Basic Science or T	ranslational
(check one):		Epidemiological	-
		Clinical	•
Publicati	ons Resulti	ing from this P	roiect
		0	- J
If the research program	does not fa	ll directly und	er the sleep
program, explain on a se	parate pag	e the relations	hip between the
sleep center and the unit			
(APPENDIX 6).			

FORM D.1. ACTIVE OR RECENT RESEARCH PROJECTS

3. The sleep program or a closely affiliated unit must provide substantial training for one or more fellows in sleep research, exclusive of the one year clinical sleep fellowship. Opportunities for training in sleep research must be also available for residents and clinical fellows. Research training must culminate in the publishing of abstracts or articles or the presentation of research findings at appropriate venues.

List fellows, residents and publications from the last three years.

Research Fellows			
Name of Fellow (excluding clinical sleep medicine fellows)	Date of Fellowship	Status of Fellow (e.g. PhD Post doctoral; MD post sleep fellowship)	Title of Project
Posidonts an	d Clinical Fol	lows Engagod in R	losoarch
Residents and Clinical Fellows Engaged in Research Status of Fellow			
Name of Resident or Clinical Fellow	Date of Research	or Resident (e.g. clinical sleep fellow; neurology resident)	Title of Project
			*
Abstracts Articles	and Present	ations by Desident	a and Fallows
Abstracts, Articles and Presentations by Residents and FellowsName of FellowDetails of Publication or Presentation			
			Tresentation

E. Administrative Requirements

1. The sleep program must be a clearly defined administrative unit with either a single director or two co-directors.

Attach an organizational description of the program as **APPENDIX 7**.

2. The sleep program must show evidence of significant involvement in decisions regarding appointment of faculty, and administration of clinical, educational and research programs, including appointment of fellows.

Provide in narrative form an explanation of the program's role in appointment of faculty, administration of programs and appointment of fellows and include as *APPENDIX 8.*
